PREFACE

This index, published in two volumes, consolidates more than 210,000 references to 36 monthly issues of *Psychological Abstracts* under 800 index terms in one alphabetical listing. While the *Psychological Abstracts* journal contains citations and full abstracts of the world's scientific literature in psychology and related disciplines, this index provides subject index phrases that enable one to identify and locate from over 50,000 records published in the 3-year period those that are specifically relevant to one's interests.

A companion reference work is the *Cumulative Author Index to Psychological Abstracts, 1969-1971.* This one-volume index provides comprehensive listing of all of an author's work covered in the 3-year period, even though multiple authorship may be involved.

Psychological Abstracts covers material from over 800 periodicals and scans about 1,200 books and separates each year. About 24% of all material covered was originally published in a foreign language.

Machine-readable tape production, initiated with foresight by Philip J. Siegmann, a former Executive Editor of *Psychological Abstracts*, enabled automated cumulation and photocomposition of both indexes. Publication of these reference works was accomplished by Robert G. Kinkade, Executive Editor and Manager, Psychological Abstracts Information Services; with the key assistance of George Thomson, Forrest Mullins, and Joan Anderson. Overall management support was provided by Kenneth B. Little, Executive Officer, American Psychological Association.

Previous subject and author cumulations are available through G. K. Hall & Co., 70 Lincoln Street, Boston, Massachusetts 02111. Their main indexes and supplementary editions reference records published in *Psychological Abstracts* from 1927 through 1967.

INTRODUCTION

Entries in this index are in the form of free index phrases arranged under appropriate index terms and followed by identifying *Psychological Abstracts* volume and record numbers. Under each index term, entries are arranged alphabetically, followed by a chronological ordering of those entries that begin with numeric characters; the few phrases with initial nonalphabetic/nonnumeric characters (e.g., parenthesis, ampersand, quotation mark) precede alphabetically ordered entries under each index heading.

This index consolidates references to records published in Volumes 43 (1969), 44 (1970), 45, and 46 (1971) of the *Psychological Abstracts* journal. References to "bibliographies," "reviews," and "books" may be located under these general index terms, as well as under index terms indicating subject matter content.

Subject index phrases generally identify the independent variable(s), dependent variable(s), and subject population(s) under consideration. An ampersand or "vs." is used to indicate that multiple items within elements are combined or contrasted, while commas are used to separate these elements. To enable economic publication, there has been no attempt to edit the tape records, and thus this volume, for stylistic inconsistencies or misspellings that do not hinder effective use of the information presented.
